SECTION 6

PLANNED DEVELOPMENT DISTRICT

I. Procedures and Regulations for Planned Development District.

- A. Establishment of a Planned Development District may occur by application in accordance with the provisions of Section 10 and in accordance with the requirements established herein within Section 6.
- B. Regulations pertaining to the use of land and/or structures and the physical development thereof are hereby established and adopted.
- C. The following rules of application shall apply:

1. **Identification of Uses:** Listed uses are to be defined by their customary names and identification, except where they are specifically defined or limited within this Resolution.
2. **Permitted Uses:** Only uses designated as a permitted use shall be allowed as a matter of right in a Planned Development and any use not so designated shall be prohibited except when in character with the proposed development and then said use may be approved as a part of the development plan.
3. **Procedures:** The procedures and conditions set forth for the determination of the Planned Development District and development therein, shall be followed except that a written statement by the applicant shall clearly show that such procedures or conditions do not apply in the specific case. Such statement shall accompany the application and is subject to approval by the Board of Trustees.
4. **Development Standards:** The development standards set forth shall be the minimums allowed for development in a Planned Development District.

D. **Purpose:**

1. **General:** The Planned Development District is provided as an option to the requirements of the standard residential district. It is intended to promote imaginative, well-designed developments which preserve open space, respect the physical qualities and limitations of the land, and provide improved living environments.

Opportunities to reduce development costs also may be realized within the District.

2. **Benefits of the Planned Development District:** To achieve these goals, the District provides the potential for public zoning approval of the following:
 - a. Flexibility in required yard areas immediately adjacent to structures.
 - b. Flexibility in structural types.
 - c. Flexibility in minimum lot frontage requirements.
 - d. Privately maintained streets, open space, and other amenities or improvements.
 - e. Consideration of other unique design features.

3. **Responsibilities of the Applicant:** In order to be eligible for consideration under the provisions of the Planned Development District, the applicant is required to provide all information listed herein. If an applicant does not provide all of the required information or meet standards established within this Resolution, it shall be interpreted as forfeiture of the applicant's option to consideration under the terms of the Planned Development District. The applicant retains the option to seek zoning map amendment subject to all requirements of the applicable standard District in which he is located.

E. **Permitted Uses:**

1. Land and buildings in the Planned Development District shall be limited to one (1) or more of the following uses:
 - a. Detached single family residences.

- b. Zero (0) lot line, attached twin single, townhouse, or other innovative form of residential development, provided all density criteria and applicable requirements are met.
- c. Home occupations as described in Sections 4 and 9.
- d. Public schools offering general educational courses and having no rooms used for housing or sleeping of students.
- e. Parks, playgrounds and play fields open to the public without fee.
- f. Public or private golf courses or other similar outdoor recreational facilities and normal accessory buildings and uses, provided all uses and functional characteristics are specifically included in the approved development plan.
- g. Other residentially oriented uses, which in the opinion of the Township Zoning Commission and Township Trustees, meet the purpose and intent of the Planned Development District and are adequately designed, located, or otherwise provided for by the development plan and other required documents.
- h. Accessory buildings and use in association with a permitted residential use.

F. Tract and Density Criteria:

- 1. The owner of a tract of land containing twenty (20) or more acres of land may request that the Zoning District Map be amended to include such tract of land in the Planned Development District.
- 2. The density of development within the Planned Development District shall not exceed a total of three (3) dwelling units per acre.

G. Procedure:

- 1. **Sketch Plan:** In exchange for flexibility, the Planned Development District requires that the applicant provide some details which are traditionally found in the subdivision stage of development approval. It is therefore suggested that the applicant informally discuss his plans with the County Engineer, County Board of Health, and County Regional Planning Commission prior to submitting a formal application. This sketch plan phase is mandatory if public streets are proposed.
- 2. **Development Plan Submission:** Seven (7) copies of a development plan, signed by a registered engineer, surveyor, or architect, shall be submitted with the application to amend the Zoning District Map. Such development plan shall conform to the following:
 - a. The plan include topographical contours at one (1) foot to two (2) foot intervals, soils information for the site, information on any natural area such as wooded areas, flood plains, and engineering plans for water, sewer, and storm water systems.
 - b. The proposed location and size of areas of residential use, indicating dwelling unit densities, dwelling unit types, the total number of dwellings units for each density area, and the total number of dwelling units proposed in the overall plan.
 - c. The proposed size, location, and use on nonresidential portions of the tract, including usable open areas, parks, playgrounds, school sites, and other areas and spaces with the suggested ownership of such areas and spaces.
 - d. Architectural design concepts to be utilized, landscaping plans, street views of typical improvements, and other information relating to the architectural and landscape themes.

- e. The proposed traffic circulation patterns, including public and private streets, parking areas, walks, access ways, including their relationship to topography, existing streets, or other evidence of reasonableness.
 - f. The proposed schedule of site development, construction of structures, and associated facilities including sketches and other materials indicating design principles and concepts to be followed in site development, construction, landscaping, and other features. Such schedule shall include the proposed use or reuse of existing features such as topography, structures, streets, and easements.
 - g. The relationship of the proposed development to existing and future land use in the surrounding area, the street system, the community facilities, services, and other public improvements.
 - h. Evidence that the applicant has sufficient control over the land to effectuate the proposed development plan. Evidence of control includes property rights and the engineering feasibility data which will be required.
 - i. Deed restrictions, protective covenants, and their legal statements or devices to be used to control the use, development, and maintenance of the land, the improvements thereon, including those areas which are to be commonly owned and maintained.
 - j. Other information, as may be required by the Township Zoning Commission or Trustees, in order to determine compliance with this Resolution.
3. **Basis of approval:** The basis for approval of a Planned Development District application shall be as follows:
- a. That the proposed development is consistent in all respects with the purpose, intent, and applicable standards of the Resolution.
 - b. That the proposed development is in conformity with a comprehensive plan or portion thereof as it may apply.
 - c. That the proposed development advances the general welfare of the township and the immediate vicinity.
 - d. That the benefits, improved arrangement, and the design of the proposed development justify the deviation from standard residential development requirements included in this Resolution.
4. **Effect of Approval:** The approval shall be for a period of one (1) years to allow the preparation of the required subdivision plat. Unless the required subdivision plat is submitted and recorded within the one (1) year time limit, the approval shall be voided and the land shall revert to its last previous Zoning District, except if an application for time extension is approved in accordance with the following section.
5. **Extension of Time or Modification:** An extension of the time limit of the approved development plan may be approved by the township trustees. Modifications may be approved according to the normal rezoning procedure. Such approval shall be given upon a finding of the purpose and necessity for such extension or modification and evidence of reasonable effort toward the accomplishment of the original approved development plan if such extension or modification is not in conflict with the general health, safety, and welfare of the public or the development standards of the Planned Development District.

H. **Development Standards:**

The following standards for arrangement and development of land and buildings apply to the Planned Development District. When not specifically supplanted by the following standards, the development standards contained in this Resolution shall also apply.

1. **Open Space:** At least twenty (20) percent of the gross area of the tract included in the development plan shall be designated as open space. Such land shall either be preserved in its natural state or developed for recreational purposes. Up to one-third (1/3) of any land within the tract devoted to public school sites or within the one hundred (100) year floodplain may be included in the open space calculation. The open space shall be of a size, shape, topography, and location to be usable and accessible.
2. **Lot and Yard Areas:** The minimum lot area shall be fourteen-thousand five-hundred twenty (14,520) square feet per dwelling unit except in cluster developments where the minimum lot area for each dwelling unit may be reduced to any size which is justified in the approved development plan. However, the overall density of the tract of land covered by the development plan may not exceed three (3) units per acre. Yard areas may also be adjusted accordingly.

However, yards abutting the boundaries of the entire tract included in the development plan shall not be less than the minimum requirements for the abutting Zoning District. Additionally, the front yard setback for all lots abutting an existing public street shall conform to the requirements of the abutting district along that street or the average if two districts apply for the entire length of the frontage on that street.

3. **Private Streets:** Private streets may be allowed if the requirements of the County Engineer and Ottawa County Subdivision Regulations are met for the streets. Maintenance plans must be identified.
4. **Parking:** Off-street parking shall be provided in accordance with Section 7 of this Resolution for all uses proposed within the development plan. Group garages or parking lots may be utilized within two-hundred (200) feet of the dwelling served.

SECTION 7

- A. **Meetings:** Meeting of the Board shall be at the call of the Chairman and at such other times as the Board may determine. The Chairman, or in his absence the Acting Chairman, may administer oaths, and the Board may compel the attendance of witnesses. All meeting of the Board shall be open to the public. The Board shall keep minutes of its proceedings showing the vote of each member upon each question, and of each member's absence or failure to vote, and every amendment or repeal thereof, and every order, requirement, decision, or determination of the Board shall be filed in the office of the Board of Township Trustees, and shall be a public record.
- B. **Appeals:** Appeals to the Board of Zoning Appeals may be taken by any person aggrieved or affected, or by any officer of the Township, regarding any decision of the zoning administrative officer. Such appeal shall be taken within twenty (20) days after the decision by filing with the officer from whom the appeal is taken, and with the Board, a notice of appeal specifying the grounds. A fee shall be paid to the Township Clerk upon the filing of each appeal for the purpose of defraying the costs of the proceedings described herein. A written receipt shall be issued to the person making such payment, and records thereof shall be kept in such a manner as prescribed by law. The officer from whom the appeal is taken shall forthwith transmit to the Board all the papers constituting the record upon which the action appealed from was taken.
- C. **Public Hearing and Decision:** The Board of Zoning Appeals shall fix a date for a public hearing of the appeal within thirty (30) days from the date of filing, and shall give at least ten (10) days notice in writing, by first-class mail, to the parties in interest, and to all owners of property within, contiguous to and directly across the streets from the property involved in the appeal; this notice shall be mailed to the addresses of such owners appearing on the County Auditor's current tax list of the Treasurer's mailing list. The failure of delivery of such notice shall not invalidate any action taken on the appeal. The Board of Zoning Appeals shall also give notice of such public hearing by one (1) publication in one (1) or more newspapers of general circulation in the township and to post such notice in one (1) or more conspicuous places on the island on which the appeal is being considered, at least ten (10) days before the date of such hearing. Upon the hearing, any person may appear in person or by attorney. The Board shall decide the appeal within thirty (30) days after the date of the public hearing. Every decision of the Board shall be based upon a finding of fact. In addition, the Board shall forthwith transmit a copy of

its decision to the applicant and the property owners who were notified of the appeal.

- D. **Variations:** A public hearing will be required and will follow the procedure described under appeals (Section 13, IV, C).
1. Two (2) copies of a provided application accompanied by a copy of a denied Certificate of Zoning and a statement of the reason of denial shall be filed with the Zoning Inspector not more than twenty (20) days from the date of such denial. The application shall include the following statement:
 - a. The nature of the variance including the specific provisions of the Zoning Resolution upon which the variance is requested.
 - b. A legal description of the property.
 - c. A statement of the general or special circumstances or conditions applying to the land or structure and not applying in other areas.
 - d. A statement showing that the granting of the application is necessary to the preservation and enjoyment of substantial property rights.
 - e. A list of property owners within, contiguous to, and directly across the street from the property involved in the application. Such list is to be in accordance with the latest County Auditor's tax list and shall include all owners and addresses.
 - f. Such other information regarding the application for variance as may be pertinent or required for action by the Board.
 - g. A plot plan showing the boundaries and dimensions of the lot, the size and location of existing structures with measurements shown, the location of adjoining structures, and other features of the parcel in question.

There are two types of variations which the township may grant: an area variance and a use variance. The factors to be considered by the Board of Zoning Appeals differ for the two types of variations. 4/00

AREA VARIANCE - FINDING OF FACT 12/04

An area variance is a departure from the provisions of the zoning resolution usually relating to setbacks, side yards, height, frontage/lot width, and lot size. These variations relate to the physical characteristics of the property. Strict enforcement of the zoning requirements for the specific lot would present "practical difficulties", basically making the property unusable.

The factors or standards to be considered and weighed for an area variance include, but are not limited to the following:

1. Whether the property in question will yield a reasonable return or whether there can be any beneficial use of the property without the variance.

2. Whether the variance is substantial.

3. Whether the essential character of the neighborhood would be substantially altered or whether adjoining properties would suffer a substantial detriment as a result of the variance.

4. Whether the variance would adversely affect the delivery of governmental services (for example, water, sewer, garbage).

5. Whether the property owner purchased the property with knowledge of the zoning restriction.

6. Whether the property owner's predicament feasibly can be prevented through some method other than a variance.

7. Whether the spirit and intent behind the zoning requirements would be observed and substantial justice done by granting the variance.

DECISION

It is therefore the decision of the Put-in-Bay Board of Zoning Appeals that this area variance petition is _____. Any conditions stated in the minutes are conditions incorporated herein by reference and made a part of this decision.

Adopted this _____ day of _____, 20__.

USE VARIANCE - FINDING OF FACT 12/04

A use variance involves the development or conversion of land for a use not permitted in the specific zoning district. The factors or standards applied to a use variance are those related to the concept of "unnecessary hardship".

A use variance must not be contrary to the public interest and the board of zoning appeals must insure that the spirit of the zoning resolution is observed. In other words, the use requested is consistent and harmonious to the existing uses. In addition, all of the following conditions must also be found to exist:

1. The special circumstances or conditions applying to the building or land in question are peculiar to such lot or property and do not

apply generally to other land or buildings in the vicinity and were not created by the applicant.

2. The granting of the application is necessary for the preservation and enjoyment of a substantial property right and not merely to serve a convenience to the applicant.

3. The authorizing of the variance will not impair an adequate supply of light and air to adjacent property or unreasonably increase the congestion in public streets, or increase the danger of fire or imperil the public safety or unreasonably diminish or impair established property values within the surrounding areas, or in any way impair the health, safety, convenience, or general welfare of the inhabitants of the Township.

DECISION

It is therefore the decision of the Put-in-Bay Board of Zoning Appeals that this use variance petition is _____. Any conditions stated in the minutes are conditions incorporated herein by reference and made a part of this decision.

Adopted this _____ day of _____, 20__.

3. **Notice of Board's Action:** Notice of the Board's action shall be sent to the applicant within ten (10) days of the decision stating their approval and/or conditions of same. In either type of variance request, the variance as granted shall be the minimum variance necessary to accomplish the reasonable use of the land or building. The granting of a variance runs with the land and is not approved for the present landowner only. The Board may attach conditions and require such guarantees or bonds as it may deem necessary to assure compliance with the objectives of this Resolution. 4/00
- E. **Conditional Uses:** A public hearing will be required and will follow the procedure described under appeals (Section 13, IV, C). Specifically listed Conditional Uses are provided for in Section 5 of this Resolution. Although often desirable, these uses will more intensely affect the surrounding area in which they are located and as such require special review.
1. **Application Requirements:** Written application for a conditional use shall be submitted in duplicate on forms provided by the Township to the Zoning Inspector. The application shall include the following statements:
 - a. A legal description of the property.
 - b. The proposed use of the property.
 - c. A statement concerning the need or desirability of the proposed use to the neighborhood or community.
 - d. A statement concerning how the proposed conditional use might impact the adjoining properties.
 - e. A list of the adjoining owners of land within, contiguous to and directly across the street from the property involved in the application. The names and addresses shall be obtained from the latest County Auditor's tax list.
 - f. A plot plan including the boundaries and dimensions of the lot, the size and location of existing structures on the lot, the location of structures and/or use on the adjoining land, and other features of the parcel of land involved. Measurement shall be shown and be accurate.
 - g. Such other information regarding the property and the surrounding area as may be pertinent to the application or required by the Board.
 2. **Conditions Required for Approval:** Approval of a conditional use may be granted if the following conditions are met as well as those listed in Sections 5-9 of this Resolution.

CONDITIONAL USE - FINDING OF FACT 12/04

A conditional use is a use authorized in a particular zoning district upon showing that such use in a specified location will comply with all of the conditions and standards for the location or operation of the use as specified in Sections 9 and 13 of the Put-in-Bay Zoning Resolution and as authorized by the Board of Zoning Appeals.

The following factors shall be analyzed by the Board of Zoning Appeals:
Section 13 Requirements:

1. The location, size and character will be in harmony with the appropriate and orderly development of the surrounding neighborhood and applicable regulations of the Zoning District in which it is to be located.

2. The proposed development is in accord with the overall development plans of the area.

3. The proposed development will be in keeping with the existing land use character and physical development potential of the area.

4. The necessity or desirability of the proposed use to the neighborhood or community has been proven.

5. If permitted, the use will be of a nature that will make vehicular and pedestrian traffic no more hazardous than is normal for the District involved, taking into consideration vehicular turning movements in relation to routes of traffic flow, proximity and relationship to intersections, adequacy of sight distances, location and access of off-street parking provisions for pedestrian traffic, with particular attention to minimizing child-vehicle contacts in residential districts.

6. The use will be designed as to its location, size, intensity, site layout and periods of operation to eliminate any possible nuisances emanating therefrom which might be injurious to the occupants or damaging to their property of any other nearby permitted uses, whether by reason of dust, noise, fumes, vibration, smoke, or lights.

7. The use will be such that the proposed location and height of buildings or structures and the location, nature and height of walls, fences and landscaping will not interfere with or discourage the appropriate development and use of adjacent land and buildings or unreasonably affect their value.

8. The use will relate harmoniously with the physical and economic aspects of the adjacent land uses regarding prevailing shopping habits,

convenience of access by prospective patrons, continuity of development, and need for particular services and facilities in specific areas of the Township.

- 9. The use is so designed, located, and proposed to be operated that the public health, safety and welfare will be protected.

- 10. The use will not cause substantial injury to the value of other property in the neighborhood in which it is to be located.

Section 9, Specific Supplemental Regulations Requirements

All of the specific supplemental regulations for the requested conditional use, as listed in the Put-in-Bay Zoning Resolution, are met and any objections to the contrary have been addressed as noted below for each listed item.

2. _____
3. _____
4. _____

DECISION

It is therefore the decision of the Put-in-Bay Board of Zoning Appeals that this conditional use application is _____. Any conditions stated in the minutes are incorporated herein by reference and made a part of this decision.

Adopted this _____ day of _____, 20__.

3. **Modifications:** If a modified approval of the original request is deemed appropriate, such modification may be a limitation on the extent or intensity of development, a requirement for additional screening by fence or landscaping, a change in the method or plan of lighting, control of access, or other conditions of development deemed appropriate. Recommendations regarding the modification of plans or other appropriate action shall be stated with the reasons for each recommendation.
4. **Notice of Board's Action:** Notice of the Board's action shall be sent to the applicant within ten (10) days of their decision stating their approval and/or conditions of same or disapproval if that be the case. Upon application by the applicant, a certificate of zoning compliance may be issued within one (1) year of the Boards final action. Failure to

apply for said zoning certificate within that time frame will require resubmission for the conditional use.
